

Silicone Solutions Ltd

Silicone Solutions are a Bolton Lancashire based company supplying a technically superior service to the rubber industry.

As one of the most established silicone rubber and general purpose silicone compound specialist.

Accompanying our range of general purpose silicone rubber compounds and similar products are our RTV's. These offer excellent adhesive strength to most manufactured materials.

Industry sectors we support

Aerospace, Electronics silicone specialist, Fabricators, cable

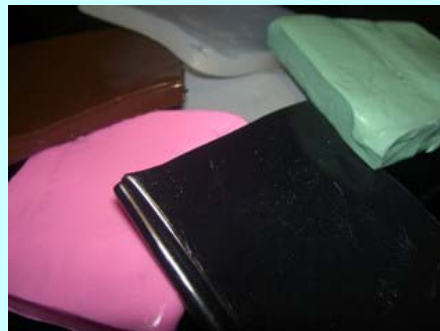

Covering Construction, Potters,

Safety Equipment, Pharmaceutical, Model making, Food equipment, Transport, Refrigeration filtration and Fabric coating.

We Pride ourselves in supplying cost effective products matched with the very highest standards of customer service.

RTV Silicone

RTV silicone consist of rubber and gel products developed for adhesion, sealing, coating and encapsulation/potting applications. The Si-O backbone of silicone provides inherent excellent temperature performance, high temperature stability and low temperature flexibility, excellent dielectric properties, and outstanding weather ability resistance. With our long history in aviation and aerospace, RTV silicones are an excellent choice for many applications.

Silicone compound

Silicone Compound's we manufacture all grades of silicone compound for moulding and extrusions, we can colour match to customer specifications, all manufactured on site.

At Silicone Solutions we have over 30 years experience in the supply and use of silicone compounds, pigment and liquid pigment master batches, encapsulants and RTV's.
